

Contents

1. Introduction.....	5
1.1 Abstract.....	5
Multi-vendor implementation.....	5
2. Objectives.....	6
2.1 Audit trail and certificates.....	6
2.2 Multi-vendor.....	6
2.3 Compatibility.....	6
2.4 Implementation.....	7
3. Concepts.....	8
3.1 Sessions.....	8
Definition.....	8
Certified sessions.....	8
Uncertified sessions.....	8
Data integrity.....	8
3.2 Roll-back.....	8
Incremental save.....	8
Roll-back.....	8
Full save.....	9
3.3 Certificates.....	9
Definition.....	9
Certificate types.....	9
State.....	9
Dirty certificates.....	10
3.4 Certificate classes.....	10
Definition.....	10
Preflight class.....	10
3.5 Certificate properties.....	11
Property categories.....	11
Basic properties.....	11
Class properties.....	11
Private properties.....	11
Storing private properties.....	12
Fingerprint.....	12
3.6 Session properties.....	12
Property categories.....	12
Basic properties.....	13
Private properties.....	13
Storing private properties.....	13
3.7 Managing certificates.....	13

Creating a certificate.....	13
Updating certificates.....	13
Removing certificates.....	13
3.8 Managing sessions.....	14
Creating a session.....	14
Dangling sessions.....	14
Updating sessions.....	14
Removing sessions.....	14
3.9 Managing users.....	15
Creating a user.....	15
Updating users.....	15
Removing users.....	15
3.10 Editing zones.....	16
Definition.....	16
Certificate sensitivity.....	16
Session changes.....	16
Usage.....	16
3.11 Validating certificates.....	16
Validation process.....	16
Validity and state.....	17
Custom validation.....	17
Recalculating certificates.....	18
3.12 Dealing with uncertified files.....	18
Definition.....	18
Trust policy.....	18
Read-only behavior.....	18
Update behavior.....	18
Proof of Preflight file.....	19
4. XMP schema.....	20
4.1 Namespace.....	20
4.2 Main properties.....	20
4.3 Session.....	21
4.4 Certificate.....	23
Class properties.....	25
4.5 Data.....	26
4.6 User.....	26
4.7 Editing zone strings	27
Editing zone nodes.....	27
Editing zone string.....	27
Overlap of editing zones.....	27
Editing zone tree.....	28
4.8 Storing private properties in PDF Objects.....	31
Entry in the document catalog.....	31

Entries in the Certified PDF 2 root dictionary.....	31
Entries in the private properties dictionary.....	31
5. Preflight class and Proof of Preflight.....	32
5.1 Preface.....	32
5.2 Definitions.....	32
Preflight certificate.....	32
Proof of Preflight ticket.....	32
Correspondence.....	32
Eligibility.....	32
5.3 XMP schema.....	33
Namespace.....	33
Class property.....	33
Proof of Preflight ticket.....	33
Property correspondence.....	34
5.4 Correspondence.....	35
Eligibility.....	35
Corresponding certificate.....	35
Maintaining correspondence.....	35
Constructing a missing preflight certificate.....	35
6. Protection.....	37
6.1 Digital signature.....	37
Type.....	37
Location.....	37
Dictionary.....	37
6.2 Managing signatures.....	37
Removing previous signatures.....	37
Validating signatures.....	38
