5 reasons to upgrade to PitStop 10

November 8, 2011

Bert van Rooijen, Solution Architect

Session topics

- 5 reasons to upgrade
- Use cases
- Question & Answer

This session will take 40 to 60 minutes of your time

*This session is **recorded** for future play-back*

5 Reasons to Upgrade Your PitStop

5 Reasons to Upgrade

- ① Accurate color handling
- ② Repurpose print PDFs for tablet devices
- ③ Force job requirements (page format, bleed, etc) with a single click
- ④ Centralize and enforce PitStop presets
- ⑤ Compatibility with latest PDF standards, OS and Adobe CS version

Accurate Color Handling

Color Management Presets

- Jobs may demand different color targets
- Synchronize your color settings with Acrobat
- Toolbar icon to switch quickly between configurations

Color Handling

- All compatible color engines are installed with the product
- Ability to remap individual color channels
- Activate black point compensation for better results
- Change all 'fake' gray/black colors to a 'real' gray/black
- Redesigned color library

Ink Coverage Check

- Calculates overprints, transparencies and blend mode
- Graphic result using a heat map

Repurpose Print PDFs for Tablet Devices

Why Do We Need Repurposing?

- Files need to be small & render quickly. This all with a high enough quality to enable zooming
- Tablet devices don't support overprint
- Print associated issues such as
 - 1 pixel hairlines (called atomic regions)
 - Redundant element
- URLs might be broken

How Can PitStop Help?

- Rasterize complex PDF files, keeping initial view
- Check if URLs are still live
- Minimize file size

Predefined Preflight Profiles

- A list of Preflight Profiles is installed with the product
- Created specifically for tablet device repurposing
- Choose between high quality or smallest file size

Force Job Requirements with a Single Click

Standardize your Target Page Format

- You know the job's target size
- You never know what size is coming in
- Creating the correct target once and use the preset over & over again

Visualize your Target Page Format

- Visualize the target before you edit the file
- Specific zones can highlight problem areas
- Adjust if needed and save the new target

Beyond Page Format

- Job requirements also specify
 - Bleed settings
 - White space for printer marks
 - If printer marks and/or slug lines are required
 - ...
- Optimize your file at the same time
 - Remove redundant elements
 - Crop images to the target format

Centralize and Enforce PitStop Presets

Multiple Copies of PitStop Pro?

- Managing presets
 - Preset management is cumbersome
 - How do you make sure the operator is using a thoroughly tested Preflight Profile?
 - What if you update your presets?
- Licensing all copies
 - Separate software activation takes time

PitStop Workgroup Manager

- Acts as a license server
 - Allows you to consolidate your volume license to 1 floating license
- Acts as a preset server
 - Will enforce any PitStop Pro presets to a group of operators
 - Administrator can be taken out of any group
 - The product will only list the presets the group is allowed to use

Compatibility with PDF Standards, OS and Adobe CS Applications

PDF Standards

- Close link to the Ghent PDF Workgroup
 - Version 2008
 - Packaging v3
- Introducing PDF/A
 - New PDF Standards mainly targeted for long term archiving
 - Current supported versions
 - PDF/A 1b
 - PDF/A 2b
 - PDF/A 2u

OS Compatibility

- Windows®
 - Microsoft® Windows® XP Professional or Home Edition SP 2
 - Microsoft® Windows® Vista Home Premium, Business or Ultimate SP 1 (Note PitStop Pro will always run in 32-bit mode)
